PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering undergraduate (Batch 2026) specializing in **Cybersecurity, Python Django Development, and Ethical Hacking**. Skilled in designing and deploying **secure, scalable, and high-performance web applications** using the **Django framework, RESTful APIs, and robust database management**. Proficient in **secure coding, vulnerability assessment, penetration testing, and threat detection**, with hands-on experience using tools such as **Burp Suite, Wireshark, Shodan, VirusTotal, and Metasploit**. Experienced in leveraging **Git and CI/CD pipelines** for streamlined development and deployment. Actively engaged in **open-source security projects, CTFs, and hackathons**, with a strong passion for building **data-driven, secure web solutions**. Seeking opportunities in **Python Django Development and Network Security** to apply technical expertise in **web security, backend engineering, and application optimization**.

EDUCATION

B.Tech in Computer Science & Engineering | Bangalore Technological Institute - **CGPA:8.51**

Nov 2022 – Apr 2026

TECHNICAL SKILLS

- Programming:** Python, HTML5, CSS3.
- Intel Tools:** Shodan, VirusTotal, OSINT, Dark Web.
- Web Development:** RESTful API Development, CRUD Operations
- KALI Tools:** Nmap, Burp, Wireshark, Metasploit.
- Databases:** PostgreSQL, MySQL, SQLite
- Frameworks:** Django, DRF, Bootstrap
- Deployment:** Cloud Hosting (Vercel / Render), Environment Configuration.
- Security:** Ethical Hacking, Pentesting, OWASP Top10.

SOFT SKILLS

- Decision-Making Under Pressure
- Adaptability & Continuous Learning
- Critical Thinking & Problem-Solving
- Time Management

CERTIFICATIONS

PYTHON CERTIFICATION | NPTEL :83%

Aug 2025

GOOGLE CLOUD CYBERSECURITY CERTIFICATE

Jun 2025

PYTHON DJANGO PROGRAMMING CERTIFICATION | UDEMY

Aug 2024

WORK EXPERIENCE

CYBERSECURITY INTERN | SHADOWFOX

Jul 2025 – Aug 2025

- Conducted malware analysis, threat hunting, and log inspection to identify Indicators of Compromise (IoCs) across Windows and Linux environments.
- Utilized Wireshark, Shodan, and SIEM tools for network traffic monitoring, anomaly detection, and detailed security reporting. Assisted in firewall configuration, port scanning detection, and vulnerability assessment to strengthen network defense mechanisms. Analyzed real-world phishing, social engineering, and ransomware case studies, applying incident response methodologies and mitigation strategies.
- Collaborated with senior analysts to draft incident reports and security documentation, enhancing team awareness and operational readiness.

PYTHON DJANGO DEVELOPER INTERN | CODECLAUSE Pvt. Ltd.

Apr 2025 – May 2025

- Built full- Developed full-stack web applications using Python Django, integrating user authentication, form validation, and PostgreSQL database management.
- Designed and implemented RESTful APIs for seamless data exchange, ensuring secure backend communication and performance optimization. Applied Agile development methodologies, participating in daily stand-ups, sprint reviews, and version control using Git and GitHub.
- Integrated frontend templates with Django views, improving UI responsiveness and maintaining clean, modularized code structure. Contributed to cybersecurity-oriented backend projects, focusing on secure coding practices, input sanitization, and data encryption techniques.

PROJECTS

SAFEGUARD-WEB-PROTECTOR | [GITHUB: <LINK>](#) |

Feb 2025 – Nov 2025

- Engineered a real-time malicious URL detection system integrated with a Chrome Extension, enabling instant classification of URLs as safe or malicious.
- Trained a Random Forest-based ML model on 1000+ URLs, achieving over 90% detection accuracy with minimal false positives.
- Integrated Google Safe Browsing API and VirusTotal API for enhanced threat intelligence, URL scanning, and cross-verification.
- Developed a Flask/FastAPI-based backend with PostgreSQL for secure URL storage, retrieval, and model inference handling.
- Focused on secure coding, scalability, and low-latency prediction, ensuring real-time protection within browser sessions.

SKILLFORGE -E-LEARNING PLATFORM | [GITHUB: <LINK>](#) |

Feb 2025 – Aug 2025

- Built SkillForge, a scalable Django-based backend for a next-gen e-learning platform supporting AI-driven learning assistance.
- Designed and deployed RESTful APIs for video streaming, course management, and secure payment processing.
- Implemented gamified learning features, user progress tracking, and leaderboards to enhance student engagement.
- Integrated role-based access control (Admin, Instructor, Student) ensuring secure and structured content access.
- Optimized backend performance with asynchronous task handling, database indexing, and modular architecture for maintainability.

SECUREVAULT - SECURE PASSWORD GENERATOR | [GITHUB: <LINK>](#) |

Jan 2025 – Feb 2025

- Created a Django-based secure password generation platform with AI-driven strength evaluation using entropy scoring and regex validation.
- Designed an interactive frontend with responsive UI for user-friendly password creation and feedback visualization.
- Implemented strong encryption logic, backend validation, and session-based user protection to ensure data confidentiality.
- Deployed the application on a cloud environment ensuring scalable performance and high availability.
- Focused on cybersecurity best practices, promoting awareness of password strength and secure authentication methods.

SMART HOSPITAL MANAGEMENT SYSTEM | [GITHUB: <LINK>](#) |

Jun 2024 – Oct 2024

- Developed a comprehensive hospital management platform using Python Django, covering patients, staff, billing, and pharmacy modules.
- Implemented secure authentication, role-based access control, and encrypted medical data storage using PostgreSQL.
- Automated key workflows like appointment scheduling, billing, and pharmacy inventory tracking, improving operational efficiency.
- Integrated real-time data synchronization and RESTful APIs for seamless inter-departmental communication.
- Enhanced system usability and reliability, resulting in faster administrative processing and improved patient service delivery.

LANGUAGES

- **English** | Full Professional Proficiency
- **Hindi** | Full Professional Proficiency
- **Kannada** | Native Bilingual language

EDUCATION

BTI-CODING CLUB| CORE MEMBER

Nov 2024 – Present

- Collaborated with peers to organize coding challenges, tech talks, and workshops on Data Structures, Python, and Web Development.
- Mentored junior students and contributed to creating a collaborative learning environment to enhance coding culture on campus.

GDG BANGALORE – COMMUNITY MEMBER

Feb 2024 – Present

- Actively participated in Google-backed developer events and workshops on AI, Cloud Security, and Modern Web Technologies.
- Expanded technical knowledge and networking by engaging with industry experts and contributing to discussions on real-world tech solutions.
